**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1, 4, and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Lawson et al. (US Patent 6,595,437)

Lawson et al. '437 shows a pump operated spray assembly comprising a housing defining an outlet opening, a water reservoir 2 in the housing 204, a tube leading from the reservoir to the outlet opening, a peristaltic pump as recited, a motor assembly operating the pump, a power supply for the motor (Column 3, lines 21-32), and a trigger-operated circuit as recited (Column 10, lines 1-8).

***Allowable Subject Matter***

Art Unit: 3752

4. Claims 2, 3, and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Lawson et al., Argentieri et al., Faeser et al., and Kuhl et al. are pertinent to Applicant's invention.
